IX5-28GPX

High Availability Video Surveillance Switch

The Allied Telesis IX5-28GPX offers an impressive set of features in a high-value package, making it ideal for IP video surveillance environments.

AlliedWare Plus™ OPERATING SYSTEM

IPv6 READY

Overview

The Allied Telesis IX5-28GPX provides a high performing and scalable solution for today's networks. With 24 PoE+ enabled 10/100/1000Mbps ports, two 1/10 Gigabit uplinks, plus the ability to stack up to four units, the IX5-28GPX is the ideal solution for video surveillance applications where high performance and resilient PoE power are critical.

High availability

The IX5-28GPX was designed with reliability in mind. It guarantees continual delivery of data and streaming video. Dual hot-swappable load-sharing power supplies provide resilient system and end-point power, with up to 30 Watts available to power today's pan, tilt and zoom cameras. Factor in the ability to operate at up to 60°C, and the IX5 is an easy choice for modern video surveillance environments.

PoE plus

Network resiliency

The convergence of network services in the enterprise has led to increasing demand for highly available networks with minimal downtime. VCStack, in conjunction with link aggregation, provides a network with no single point of failure and an easy, resilient solution for high availability applications. The IX5-28GPX can form a VCStack of up to four units for enhanced resiliency and simplified device management.

Allied Telesis Ethernet Protection Switched Ring (EPSRing™), and the standards-based G.8032 Ethernet Ring Protection, ensure that distributed network segments have high-speed, resilient access to online resources and applications.

Ring Protection and VCStack-LD (Long Distance), which enables stacks to be created over long distance fiber links, make the IX5-28GPX the perfect choice for distributed environments.

Simplified network management

Modern converged networks have increasing management requirements. Allied Telesis Autonomous Management Framework (AMF) automates many everyday tasks, including configuration management, saving you valuable time and resources. The complete network can be managed as a single virtual device with powerful centralized management features. Growing the network can be accomplished with plug-and-play simplicity, and network node recovery is fully zero-touch.

AMF secure mode increases network security with management traffic encryption, authorization, and monitoring.

Advanced operating system

The IX5-28GPX runs the advanced AlliedWare Plus™ fully featured operating system, delivering a rich feature set and an industry-standard CLI. The industry-standard CLI reduces training requirements and is consistent across all AW+ devices, simplifying network management.

Secure

Advanced security features protect the network from the edge to the core. Unprecedented control over user access is provided with Network Access Control (NAC), to mitigate threats to network infrastructure. This ensures the network is accessed only by known users and devices - users' adherence to network security policies is checked, and either access is granted or remediation is offered. Secure access can also be provided for guests. A secure network environment is guaranteed, with powerful control over network traffic types, secure management options, and other multi- layered security features built right into the IX5-28GPX switch.

Future-proof

The flexibility of the IX5-28GPX, coupled with the ability to seamlessly add new nodes to a VCStack of multiple units, ensures a future-proof network. The IX5-28GPX comes with a comprehensive IPv6 feature set, ensuring it is ready for future network traffic demands.

Eco-friendly

The IX5-28GPX supports Energy Efficient Ethernet, which automatically reduces the power consumed by the switch whenever there is no traffic on a port. This sophisticated feature can significantly reduce operating costs, by reducing the power requirements of the switch and any associated cooling equipment.

eco friendly

New Features

▶ AMF secure mode

▶ G.8032 Ethernet Ring Protection

▶ Ethernet CFM

▶ ACLs for management traffic

▶ Active Fiber Monitoring

▶ Microsoft Network Load Balancing (MS NLB) support

▶ VLAN Mirroring (RSPAN)

VCStack™   AMF™   EPSRing™   ACTIVE Fiber Monitoring™

Key Features

Reliable

▶ Dual hot-swappable load-sharing power supplies maximize network uptime, ensuring a resilient solution where always-on access is required.

Allied Telesis Autonomous Management Framework (AMF)

▶ Allied Telesis Autonomous Management Framework (AMF) is a sophisticated suite of management tools that provide a simplified approach to network management. Common tasks are automated or made so simple that the every-day running of a network can be achieved without the need for highly-trained, and expensive, network engineers. Powerful features like centralized management, auto-backup, auto-upgrade, auto-provisioning and auto-recovery enable plug-and-play networking and zero-touch management.

▶ AMF secure mode encrypts all AMF traffic, provides unit and user authorization, and monitors network access to greatly enhance network security.

VCStack ™(Virtual Chassis Stacking)

▶ Create a VCStack of up to four IX5 units with 40Gbps of stacking bandwidth to each unit. VCStack provides a highly available system where network resources are spread out across stacked units, reducing the impact if one of the units fails. Aggregating switch ports on different units across the stack provides excellent network resiliency.

Long-distance Stacking

▶ Long-distance stacking allows a VCStack to be created over longer distances, perfect for a distributed network environment.

EPSRing™(Ethernet Protection Switched Ring)

▶ EPSRing and 10 Gigabit Ethernet allow several IX5 switches to form a high-speed protected ring capable of recovery within as little as 50ms. This feature is ideal for large IP surveillance environments.

▶ Super-Loop Protection enables a link between two EPSR nodes to be in separate EPSR domains, improving redundancy and network fault resiliency.

G.8032 Ethernet Ring Protection

▶ G.8032 provides standards-based high-speed ring protection, that can be deployed stand-alone, or interoperate with Allied Telesis EPSR.

▶ Ethernet Connectivity Fault Monitoring (CFM) proactively monitors links and VLANs, and provides alerts when a fault is detected.

Industry-leading Quality of Service (QoS)

▶ Comprehensive low-latency wire speed QoS provides flow-based traffic management with full classification, prioritization, traffic shaping and min/max bandwidth profiles. Boosted network performance and guaranteed delivery of business-critical Ethernet services and applications are provided. Time-critical services such as voice and video take precedence over non-essential services such as file downloads, maintaining responsiveness of Enterprise applications.

Loop Protection

▶ Thrash limiting, also known as rapid MAC movement, detects and resolves network loops. It is highly user-configurable — from the rate of looping traffic to the type of action the switch should take when it detects a loop.

▶ With thrash limiting, the switch only detects a loop when a storm has occurred, which can potentially cause disruption to the network. To avoid this, loop detection works in conjunction with thrash limiting to send special Loop Detection Frame (LDF) packets that the switch listens for. If a port receives an LDF packet, the port, or link can be disabled, or an SNMP trap can be sent. This feature can help to detect loops before a network storm occurs, avoiding the risk and inconvenience of traffic disruption.

Power over Ethernet Plus (PoE+)

▶ With PoE, a separate power connection to media endpoints such as IP phones and wireless access points is not necessary. PoE+ reduces costs and provides even greater flexibility, providing the capability to connect devices requiring more power (up to 30 Watts) such as, tilt and zoom security cameras.

Link Layer Discovery Protocol – Media Endpoint Discovery (LLDP – MED)

▶ LLDP-MED extends LLDP basic network endpoint discovery and management functions. LLDP-MED allows for media endpoint specific messages, providing detailed information on power requirements, network policy, location discovery (for Emergency Call Services) and inventory.

Voice VLAN

▶ Voice VLAN automatically separates voice and data traffic into two different VLANs. This automatic separation places delay-sensitive traffic into a voice- dedicated VLAN, which simplifies QoS configurations.

sFlow

▶ sFlow is an industry-standard technology for monitoring high-speed switched networks. It provides complete visibility into network use, enabling performance optimization, usage accounting/billing, and defense against security threats. Sampled packets sent to a collector ensure it always has a real-time view of network traffic.

VLAN Mirroring (RSPAN)

▶ VLAN mirroring allows traffic from a port on a remote switch to be analysed locally. Traffic being transmitted or received on the port is duplicated and sent across the network on a special VLAN.

Dynamic Host Configuration Protocol (DHCP) Snooping

▶ DHCP servers allocate IP addresses to clients, and the switch keeps a record of addresses issued on each port. IP source guard checks against this DHCP snooping database to ensure only clients with specific IP and/or MAC address can access the network. DHCP snooping can be combined with other features, like dynamic ARP inspection, to increase security in Layer 2 switched environments, and also provides a traceable history, which meets the growing legal requirements placed on service providers.

Tri-authentication

▶ Authentication options on the IX5 also include alternatives to IEEE 802.1x port-based authentication, such as web authentication to enable guest access and MAC authentication for endpoints that do not have an IEEE 802.1x supplicant. All three authentication methods—IEEE 802.1x, MAC-based and Web-based—can be enabled simultaneously on the same port for tri-authentication.

Access Control Lists (ACLs)

▶ AlliedWare Plus delivers industry-standard Access Control functionality through ACLs. ACLs filter network traffic to control whether routed packets are forwarded or blocked at the port interface. This provides a powerful network security mechanism to select the types of traffic to be analyzed, forwarded, or influenced in some way.

Optical DDM

▶ Most modern optical SFP/SFP+/XFP transceivers support Digital Diagnostics Monitoring (DDM) functions according to the specification SFF-8472. This enables real time monitoring of the various parameters of the transceiver, such as optical output power, temperature, laser bias current and transceiver supply voltage. Easy access to this information simplifies diagnosing problems with optical modules and fiber connections.

Active Fiber Monitoring

▶ Active Fiber Monitoring prevents eavesdropping on fiber communications by monitoring received optical power. If an intrusion is detected, the link can be automatically shut down, or an operator alert can be sent.

UniDirectional link Detection

▶ UniDirectional Link Detection (UDLD) is useful for monitoring fiber-optic links between two switches that use two single-direction fibers to transmit and receive packets. UDLD prevents traffic from being sent across a bad link by blocking the ports at both ends of the link in the event that either the individual transmitter or receiver for that connection fails.
Key Solutions

Diagram 1: IP Video Surveillance

IP Video Surveillance

With the evolution of CCTV technology to digital IP-based systems, the emphasis has moved from simple video footage monitoring, to intelligent systems with video analytics capable of identifying abnormal events or behavior. As intelligence increases in these systems, so too do the applications for this technology – from retail outlets, warehouses and office buildings, to hotels, hospitals and advanced traffic monitoring systems.

Modern high definition digital images are sharper and clearer than ever before. Large amounts of digital video can be stored on Network-Attached Storage (NAS) systems, and digital images don't degrade over time.

Allied Telesis provides secure and resilient IP video surveillance network solutions. The key features of our AT-IX5-28GPX switch make it ideal for use in advanced surveillance systems:

► Dual hot-swappable load-sharing power supplies, and support for operation up to 60°C ensure maximum network uptime.
► Power over Ethernet (PoE+) provides up to 30 Watts to end-points, supporting the latest generation of pan, tilt and zoom IP cameras.
► High performance multicast support manages large numbers of digital video streams across the network.
► Long-Distance Virtual Chassis Stacking (VCStack-LD) is ideal to spread network distribution, while keeping total resilience.
► Ethernet Protection Switched Rings (EPSR) provides a high-speed ring topology with failover in a little as 50ms, supporting large IP surveillance environments with an 'always-on' solution.

With the AT-IX5-28GPX and other advanced switching products, Allied Telesis IP video surveillance solutions are dependable, scalable and ready for the next generation of digital monitoring technologies.

Product Specifications

PRODUCT	10/100/1000T (RJ-45) COPPER PORTS	100/1000X SFP PORTS	1/10 GIGABIT SFP+ PORTS	10 GIGABIT STACKING PORTS	MAX POE+ PORTS	SWITCHING FABRIC	FORWARDING RATE
AT-IX5-28GPX	24	-	2	2*	24	128Gbps	95.2Mpps

* Stacking ports can be configured as additional 1G/10G Ethernet ports when unit is not stacked

Performance
▶ 40 Gbps of stacking bandwidth
▶ Supports 13kB Jumbo frames
▶ Wirespeed multicasting
▶ Up to 16K MAC addresses
▶ 512MB DDR SDRAM
▶ 64MB flash memory
▶ Packet Buffer memory: 2MB

Reliability
▶ Modular AlliedWare Plus operating system
▶ Redundant power supplies load share providing uninterrupted power and extra reliability
▶ Full environmental monitoring of PSUs, fans, temperature and internal voltages. SNMP traps alert network managers in case of any failure

Power Characteristics
▶ AC voltage: 90 to 260V (auto-ranging)
▶ Frequency: 47 to 63Hz

Expandability
▶ Stackable up to four units of IX5 in a VCStack

Flexibility and Compatibility
▶ 10G SFP+ ports will support any combination of Allied Telesis 1000Mbps SFP and 10GbE SFP+ modules and direct attach cables listed in this document under Ordering Information
▶ Stacking ports can be configured as 10G Ethernet ports
▶ Port speed and duplex configuration can be set manually or by auto-negotiation

Diagnostic Tools
▶ Active Fiber Monitoring detects tampering on optical links
▶ Built-In Self Test (BIST)
▶ Find-me device locator
▶ Cable fault locator (TDR)
▶ UniDirectional Link Detection (UDLD)
▶ Automatic link flap detection and port shutdown
▶ Optical Digital Diagnostic Monitoring (DDM)
▶ Ping polling for IPv4 and IPv6
▶ Port and VLAN mirroring (RSPAN)
▶ TraceRoute for IPv4 and IPv6

IPv4 Features
▶ Black hole routing
▶ Directed broadcast forwarding
▶ DNS relay
▶ Policy-based routing
▶ IPv4 static routing
▶ UDP broadcast helper (IP helper)

IPv6 Features
▶ DHCPv6 relay, DHCPv6 client
▶ DNSv6 relay, DNSv6 client
▶ IPv4 and IPv6 dual stack
▶ IPv6 hardware ACLs

▶ Device management over IPv6 networks with SNMPv6, Telnetv6 and SSHv6
▶ NTPv6 client and server
▶ IPv6 static routing

Management
▶ Front panel 7-segment LED provides at-a-glance status and fault information
▶ Allied Telesis Management Framework (AMF) enables powerful centralized management and zero-touch device installation and recovery
▶ Console management port on the front panel for ease of access
▶ Eco-friendly mode allows ports and LEDs to be disabled to save power
▶ Web-based Graphical User Interface (GUI)
▶ Industry-standard CLI with context-sensitive help
▶ Powerful CLI scripting engine and built-in text editor
▶ Comprehensive SNMP MIB support for standards-based device management
▶ Event-based triggers allow user-defined scripts to be executed upon selected system events
▶ USB interface allows software release files, configurations and other files to be stored for backup and distribution to other devices

Quality of Service (QoS)
▶ 8 priority queues with a hierarchy of high priority queues for real time traffic, and mixed scheduling, for each switch port
▶ Limit bandwidth per port or per traffic class down to 64kbps
▶ Wirespeed traffic classification with low latency essential for VoIP and real-time streaming media applications
▶ Policy-based QoS based on VLAN, port, MAC and general packet classifiers
▶ Policy-based storm protection
▶ Extensive remarking capabilities
▶ Taildrop for queue congestion control
▶ Strict priority, weighted round robin or mixed scheduling
▶ IP precedence and DiffServ marking based on layer 2, 3 and 4 headers

Resiliency
▶ Stacking ports can be configured as 10G Ethernet ports
▶ Control Plane Prioritization (CPP) ensures the CPU always has sufficient bandwidth to process network control traffic
▶ Dynamic link failover (host attach)
▶ EPSRing (Ethernet Protection Switched Rings) with SuperLoop Protection (SLP)
▶ EPSR enhanced recovery for extra resiliency
▶ Long-Distance stacking (LD-VCStack)
▶ Loop protection: loop detection and thrash limiting
▶ PVST+ compatibility mode
▶ STP root guard
▶ VCStack fast failover minimizes network disruption

Security
▶ Access Control Lists (ACLs) based on layer 3 and 4 headers
▶ Configurable ACLs for management traffic
▶ Auth-fail and guest VLANs
▶ Authentication, Authorisation and Accounting (AAA)
▶ Bootloader can be password protected for device security
▶ BPDU protection
▶ DHCP snooping, IP source guard and Dynamic ARP Inspection (DAI)
▶ DoS attack blocking and virus throttling
▶ Dynamic VLAN assignment
▶ MAC address filtering and MAC address lock-down
▶ Network Access and Control (NAC) features manage endpoint security
▶ Port-based learn limits (intrusion detection)
▶ Private VLANs provide security and port isolation for multiple customers using the same VLAN
▶ Secure Copy (SCP)
▶ Strong password security and encryption
▶ Tri-authentication: MAC-based, web-based and IEEE 802.1x
▶ RADIUS group selection per VLAN or port

Environmental Specifications
▶ Operating temperature range: 0°C to 50°C (32°F to 122°F) nominal

  0°C to 60°C (32°F to 140°F) with 2 x PWR800 and 250W PoE max. Derated by 1°C per 305 meters (1,000 ft)
▶ Storage temperature range: -25°C to 70°C (-13°F to 158°F)
▶ Operating relative humidity range: 5% to 90% non-condensing
▶ Storage relative humidity range: 5% to 95% non-condensing
▶ Operating altitude: 3,048 meters maximum (10,000 ft)

Electrical Approvals and Compliances
▶ EMC: EN55022 class A, FCC class A, VCCI class A, ICES-003 class A
▶ Immunity: EN55024, EN61000-3-levels 2 (Harmonics), and 3 (Flicker) – AC models only

Safety
▶ Standards: UL60950-1, CAN/CSA-C22.2 No. 60950-1-03, EN60950-1, EN60825-1, AS/NZS 60950.1
▶ Certification: UL, cUL

Restrictions on Hazardous Substances (RoHS) Compliance
▶ EU RoHS compliant
▶ China RoHS compliant

Country of Origin
▶ China

Version 5.4.7-1

Cryptographic Algorithms
FIPS Approved Algorithms
Encryption (Block Ciphers):
- ▶ AES (ECB, CBC, CFB and OFB Modes)
- ▶ 3DES (ECB, CBC, CFB and OFB Modes)

Block Cipher Modes:
- ▶ CCM
- ▶ CMAC
- ▶ GCM
- ▶ XTS

Digital Signatures & Asymmetric Key Generation:
- ▶ DSA
- ▶ ECDSA
- ▶ RSA

Secure Hashing:
- ▶ SHA-1
- ▶ SHA-2 (SHA-224, SHA-256, SHA-384. SHA-512)

Message Authentication:
- ▶ HMAC (SHA-1, SHA-2(224, 256, 384, 512)

Random Number Generation:
- ▶ DRBG (Hash, HMAC and Counter)

Non FIPS Approved Algorithms
RNG (AES128/192/256)
DES
MD5

Ethernet
IEEE 802.2   Logical Link Control (LLC)
IEEE 802.3   Ethernet
IEEE 802.3ab 1000BASE-T
IEEE 802.3ae 10 Gigabit Ethernet
IEEE 802.3af Power over Ethernet (PoE)
IEEE 802.3at Power over Ethernet plus (PoE+)
IEEE 802.3az Energy Efficient Ethernet (EEE)
IEEE 802.3x Flow control - full-duplex operation
IEEE 802.3z 1000BASE-X

IPv4 Features
RFC 768	User Datagram Protocol (UDP)
RFC 791	Internet Protocol (IP)
RFC 792	Internet Control Message Protocol (ICMP)
RFC 793	Transmission Control Protocol (TCP)
RFC 826	Address Resolution Protocol (ARP)
RFC 894	Standard for the transmission of IP datagrams over Ethernet networks
RFC 919	Broadcasting Internet datagrams
RFC 922	Broadcasting Internet datagrams in the presence of subnets
RFC 932	Subnetwork addressing scheme
RFC 950	Internet standard subnetting procedure
RFC 951	Bootstrap Protocol (BootP)
RFC 1027	Proxy ARP
RFC 1035	DNS client
RFC 1042	Standard for the transmission of IP datagrams over IEEE 802 networks
RFC 1071	Computing the Internet checksum
RFC 1122	Internet host requirements
RFC 1191	Path MTU discovery
RFC 1518	An architecture for IP address allocation with CIDR
RFC 1519	Classless Inter-Domain Routing (CIDR)
RFC 1542	Clarifications and extensions for BootP
RFC 1591	Domain Name System (DNS)
RFC 1812	Requirements for IPv4 routers
RFC 1918	IP addressing
RFC 2581	TCP congestion control

IPv6 Features
RFC 1981	Path MTU discovery for IPv6
RFC 2460	IPv6 specification
RFC 2464	Transmission of IPv6 packets over Ethernet networks
RFC 3484	Default address selection for IPv6
RFC 3587	IPv6 global unicast address format
RFC 3596	DNS extensions to support IPv6
RFC 4007	IPv6 scoped address architecture
RFC 4193	Unique local IPv6 unicast addresses
RFC 4213	Transition mechanisms for IPv6 hosts and routers
RFC 4291	IPv6 addressing architecture
RFC 4443	Internet Control Message Protocol (ICMPv6)
RFC 4861	Neighbor discovery for IPv6
RFC 4862	IPv6 Stateless Address Auto-Configuration (SLAAC)
RFC 5014	IPv6 socket API for source address selection
RFC 5095	Deprecation of type 0 routing headers in IPv6
RFC 5175	IPv6 Router Advertisement (RA) flags option
RFC 6105	IPv6 Router Advertisement (RA) guard

Management
AT Enterprise MIB with AMF MIB and SNMP traps
Optical DDM MIB

RFC 4293   MIB for the Internet Protocol (IP)
RFC 4318   Definitions of managed objects for bridges with RSTP
RFC 4560   Definitions of managed objects for remote ping, traceroute and lookup operations
RFC 5424   Syslog protocol
RFC 6527   Definitions of managed objects for VRRPv3

Multicast Support
IGMP query solicitation
IGMP snooping (IGMPv1, v2 and v3)
IGMP snooping fast-leave
IGMP/MLD multicast forwarding (IGMP/MLD proxy)
MLD snooping (MLDv1 and v2)
RFC 1112   Host extensions for IP multicasting (IGMPv1)
RFC 2236   Internet Group Management Protocol v2 (IGMPv2)
RFC 2710   Multicast Listener Discovery (MLD) for IPv6
RFC 2715   Interoperability rules for multicast routing protocols
RFC 3306   Unicast-prefix-based IPv6 multicast addresses
RFC 3376   IGMPv3
RFC 3810   Multicast Listener Discovery v2 (MLDv2) for IPv6
RFC 4541   IGMP and MLD snooping switches

Quality of Service (QoS)
IEEE 802.1p   Priority tagging
RFC 2211   Specification of the controlled-load network element service
RFC 2474   DiffServ precedence for eight queues/port
RFC 2475   DiffServ architecture
RFC 2597   DiffServ Assured Forwarding (AF)
RFC 2697   A single-rate three-color marker
RFC 2698   A two-rate three-color marker
RFC 3246   DiffServ Expedited Forwarding (EF)

Resiliency Features
ITU-T G.8023 / Y.1344 Ethernet Ring Protection Switching (ERPS)
IEEE 802.1AX Link aggregation (static and LACP)
IEEE 802.1D   MAC bridges
IEEE 802.1s   Multiple Spanning Tree Protocol (MSTP)
IEEE 802.1w   Rapid Spanning Tree Protocol (RSTP)
IEEE 802.3ad Static and dynamic link aggregation
RFC 5798   Virtual Router Redundancy Protocol version 3 (VRRPv3) for IPv4 and IPv6

Security Features
SSH remote login
SSLv2 and SSLv3
TACACS+ Accounting, Authentication and Accounting (AAA)
IEEE 802.1X authentication protocols (TLS, TTLS, PEAP and MD5)
IEEE 802.1X multi-supplicant authentication
IEEE 802.1X port-based network access control
RFC 2560   X.509 Online Certificate Status Protocol (OCSP)
RFC 2818   HTTP over TLS ("HTTPS")
RFC 2865   RADIUS authentication
RFC 2866   RADIUS accounting
RFC 2868   RADIUS attributes for tunnel protocol support
RFC 2986   PKCS #10: certification request syntax specification v1.7
RFC 3546   Transport Layer Security (TLS) extensions
RFC 3579   RADIUS support for Extensible Authentication Protocol (EAP)
RFC 3580   IEEE 802.1x RADIUS usage guidelines
RFC 3748   PPP Extensible Authentication Protocol (EAP)
RFC 4251   Secure Shell (SSHv2) protocol architecture
RFC 4252   Secure Shell (SSHv2) authentication protocol
RFC 4253   Secure Shell (SSHv2) transport layer protocol
RFC 4254   Secure Shell (SSHv2) connection protocol
RFC 5246   Transport Layer Security (TLS) v1.2
RFC 5280   X.509 certificate and Certificate Revocation List (CRL) profile
RFC 5425   Transport Layer Security (TLS) transport mapping for Syslog
RFC 5656   Elliptic curve algorithm integration for SSH

RFC 6125   Domain-based application service identity within PKI using X.509 certificates with TLS
RFC 6614   Transport Layer Security (TLS) encryption for RADIUS
RFC 6668   SHA-2 data integrity verification for SSH

Services
RFC 854   Telnet protocol specification
RFC 855   Telnet option specifications
RFC 857   Telnet echo option
RFC 858   Telnet suppress go ahead option
RFC 1091   Telnet terminal-type option
RFC 1350   Trivial File Transfer Protocol (TFTP)
RFC 1985   SMTP service extension
RFC 2049   MIME
RFC 2131   DHCPv4 (server, relay and client)
RFC 2132   DHCP options and BootP vendor extensions
RFC 2616   Hypertext Transfer Protocol - HTTP/1.1
RFC 2821   Simple Mail Transfer Protocol (SMTP)
RFC 2822   Internet message format
RFC 3046   DHCP relay agent information option (DHCP option 82)
RFC 3315   DHCPv6 (server, relay and client)
RFC 3633   IPv6 prefix options for DHCPv6
RFC 3646   DNS configuration options for DHCPv6
RFC 3993   Subscriber-ID suboption for DHCP relay agent option
RFC 4330   Simple Network Time Protocol (SNTP) version 4
RFC 5905   Network Time Protocol (NTP) version 4

VLAN Support
Generic VLAN Registration Protocol (GVRP)
IEEE 802.1ad Provider bridges (VLAN stacking, Q-in-Q)
IEEE 802.1Q   Virtual LAN (VLAN) bridges
IEEE 802.1v   VLAN classification by protocol and port
IEEE 802.3ac VLAN tagging

Voice over IP (VoIP)
LLDP-MED   ANSI/TIA-1057

Ordering Information

Switch and Power Supply options

AT-IX5-28GPX-00
24-port 10/100/1000BASE-T stackable PoE+ switch with 4 SFP+ ports and 2 power supply bays
Note: Power supplies ordered separately

AT-RKMT-SL01
Sliding rack mount kit

AT-PWR800-xx
800W AC system and PoE+ power supply

Where xx =   10 for US power cord
20 for no power cord
30 for UK power cord
40 for Australian power cord
50 for European power cord

10GbE SFP+ Modules

AT-SP10SR**
10GSR 850 nm short-haul, 300 m with MMF

AT-SP10SR/I
10GSR 850 nm short-haul, 300 m with MMF industrial temperature

AT-SP10LRM
10GLRM 1310 nm short-haul, 220 m with MMF

AT-SP10LR**
10GLR 1310 nm medium-haul, 10 km with SMF

AT-SP10LR/I
10GLR 1310 nm medium-haul, 10 km with SMF industrial temperature

AT-SP10LR20/I
10GER 1310nm long-haul, 20 km with SMF industrial temperature

AT-SP10ER40/I**
10GER 1310nm long-haul, 40 km with SMF industrial temperature

AT-SP10ZR80/I**
10GER 1550nm long-haul, 80 km with SMF industrial temperature

** These modules support dual-rate 1G/10G operation

AT-SP10TW1
1 meter SFP+ direct attach cable

AT-SP10TW3
3 meter SFP+ direct attach cable

AT-SP10TW7
7 meter SFP+ direct attach cable

SFP Modules

AT-SPSX
1000SX GbE multi-mode 850nm fiber up to 550m

AT-SPSX/I
1000SX GbE multi-mode 850nm fiber up to 550m industrial temperature

AT-SPEX
1000X GbE multi-mode 1310nm fiber up to 2km

AT-SPLX10
1000LX GbE single-mode 1310nm fiber up to 10km

AT-SPLXI0/1
1000LX GbE single-mode 1310nm fiber up to 10km industrial temperature

AT-SPBDI0-13
1000LX GbE Bi-Di (1310nm Tx, 1490nm Rx) fiber up to 10km

AT-SPBDI0-14
1000LX GbE Bi-Di (1490nm Tx, 1310nm Rx) fiber up to 10km

AT-SPLX40
1000LX GbE single-mode 1310nm fiber up to 40km

AT-SPZX80
1000ZX GbE single-mode 1550nm fiber up to 80km

AT-SPBD20-13/I
1000BX GbE Bi-Di (1310 nm Tx, 1550 nm Rx) fiber up to 20 km

AT-SPBD20-14/I
1000BX GbE Bi-Di (1490 nm Tx, 1310 nm Rx) fiber up to 20 km

Feature Licenses

NAME	DESCRIPTION	INCLUDES	STACK LICENSING
AT-FL-IX5-EPSR	IX5 EPSR Master and UDLD License	▶ EPSR Master ▶ UDLD	▶ One license per stack member
AT-FL-IX5-8032	ITU-T G.8032 license	▶ G.8032 ring protection ▶ Ethernet CFM	▶ One license per stack member
