

iGS950 Series

Gigabit WebSmart Edge Switches

The Allied Telesis iGS950 Series of WebSmart network switches demonstrates the Allied Telesis commitment to environmentally-friendly processes and products, minimizing power consumption through the use of a high efficiency power supply and a low power chipset. Featuring PoE+, iGS950 Series switches at the network edge are the ideal cost-effective solution for small businesses.

Ease of management and high performance

These advanced Allied Telesis WebSmart switches combine the simplicity of unmanaged switches with the performance and reliability of managed switches. This provides a cost-effective, secure and reliable solution for integrated management at the network edge. With user-friendly web-based management, the iGS950 Series is ideal for integrating simple management and security into your network solution.

Power over Ethernet (PoE)

The iGS950/10PS, 20PS, 28PS and 52PS switches are available in PoE+ (IEEE 802.3at), with the capability of delivering up to 30W per port.

PoE allows users to connect and power a device using a single Ethernet cable, thus eliminating the need for additional power outlets and simplifying installation. Furthermore, this system is unaffected by any local variance in AC power, offering a standardized power infrastructure.
